

Splitting your Vodafone WiFi Signal

This method only applies to the Vodafone Arris Connect modem.

To Wirelessly Connect:

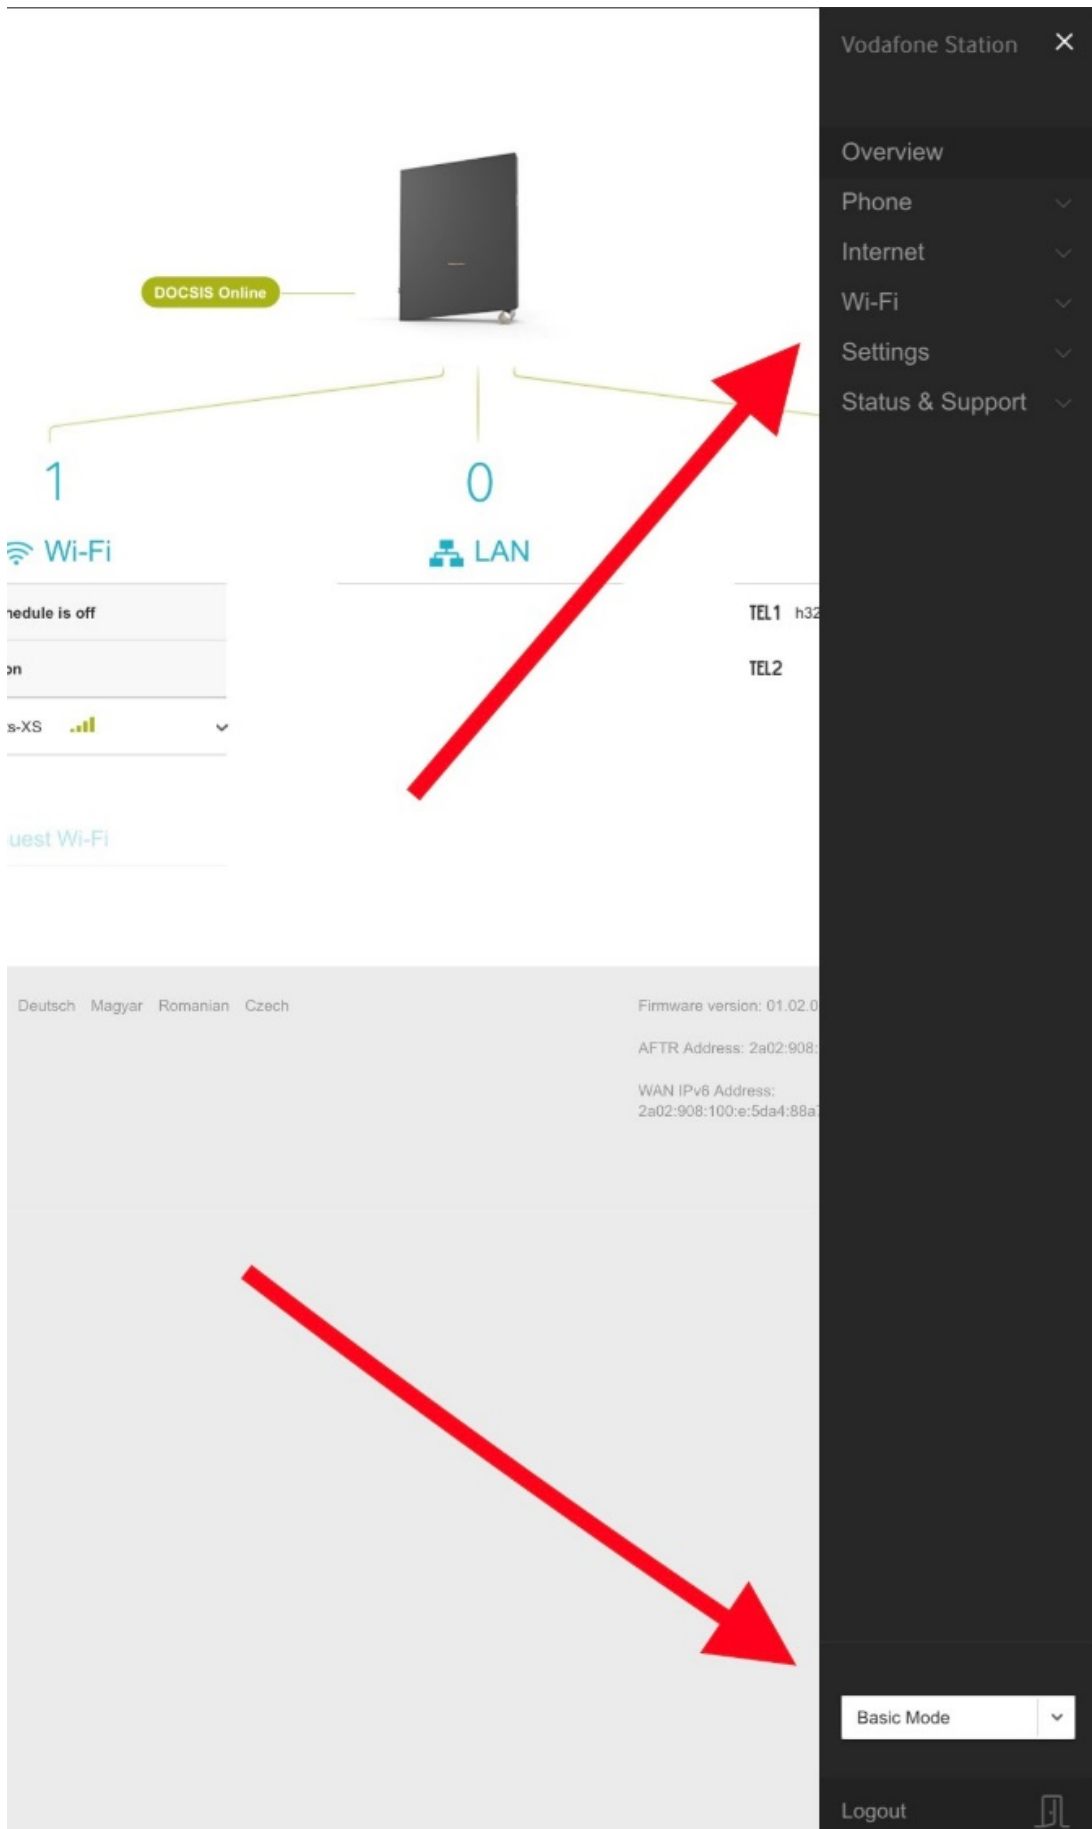

On your phone or tablet open a web browser. Chrome and Firefox both have issues connecting to the modem's firmware, the best we have found is Duck Duck Go.

Enter the address <http://192.168.0.1> and this screen will appear; you will also be asked if you would like to change your modem's password. Should you change any of the settings and forget the new passwords the modem can be reset to the original details on the card or back of the machine.

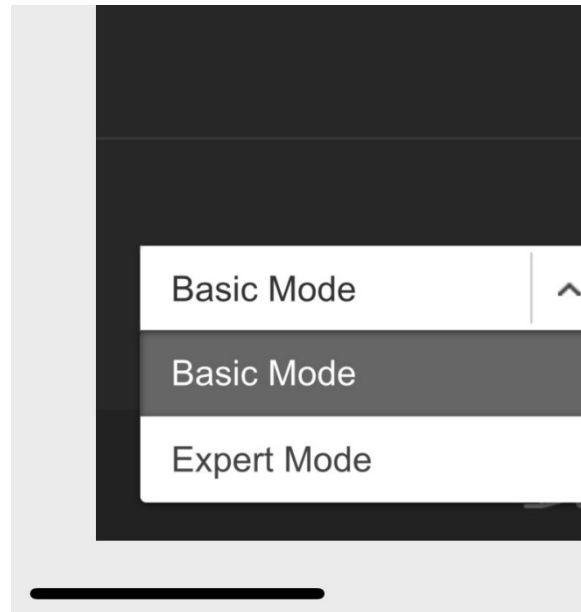

Here you can change the language to English.

Leave the top box as "Admin" and enter your modem's Password (Kennwort) in the next box. This password can be found on the bottom line of your Wifi card or printed on the back of the modem. It is NOT your WiFi password.

Here you can change from “Basic Mode” to “Expert Mode”. You might need to zoom out on your phone’s screen to see this option.

Once done click on the Wi-Fi choice on the right menu and choose General.

General

Reset

Connect your wireless devices in a simple way. Make use of the industry-wide supported Wi-Fi standards (802.11g/n/ac).

- Enable Wi-Fi
- Split SSID
- Enable Band Steering
- Enable Guest Wi-Fi

Setup

Main Wi-Fi (2,4 GHz & 5 GHz)

Wi-Fi Name (SSID)

Broadcast SSID

Protection Mode
 ▼

Wi-Fi Password

Here you can also change your WiFi name and Password for both signals.

Slide the “Split SSID” button to the right until it changes from grey to green and then click “Apply” at the bottom of the screen.

Enable Guest Wi-Fi

Setup

Main Wi-Fi (2,4 GHz)

Wi-Fi Name (SSID)
Vodafone-1674

Broadcast SSID

Protection Mode
WPA2

Wi-Fi Password

Main Wi-Fi (5 GHz)

Wi-Fi Name (SSID)
Vodafone-1674_5G

Broadcast SSID

Protection Mode
WPA2
Off
WPA2
WPA + WPA2
Display Characters
Change Password

Apply change here

Apply Cancel

The modem will then reset. This will take 2 or 3 minutes. Your browser will refresh and you can now log out.

The 2 WiFi signals will now be visible in your device’s list of available networks. Connect to both. Your device will choose the best signal for you.
